Hygienic grade Range H

PROGRESSING CAVITY PUMP

made for your process

Features:

Hygienic:
We supply hygienic pumps, particularly designed to satisfy the most rigorous requirements and to avoid product contamination and spoiling.

Cleaning:
Manufactured free of any stagnation areas, the “H” range is available with clean in place system (CIP) and bypass ports.

Viscous Products:
For very concentrated viscous liquids, our hygienic models can work at low speeds and can be manufactured with enlarged inlets or with a hopper and an auger to convey the material into the pump.

Shear Sensitive Liquids:
The pumped product is always transferred gently. The progressive cavity pump principle doesn't generate a centrifugal action and there is no big changes in speed which would damage the product inexorably.

Material Selection:
Inside the company we produce the most important components of our pumps, this factor gives us the possibility to keep total control over the quality of the final product.

Discharge Flange:
Polished stainless steel manufactured. Different connections available: DIN 11851, Clamp, RJT, SMS, DIN 2501, ISO, GAS and others

Stator:
Large choice of construction materials: Buna (white and black), EPDM, Viton, Hypalon and others.

Connecting rod:
Stainless steel manufactured and available with feed screw (for high viscosity fluids)

Mechanical seal:
We install a single mechanical seal: Silicon carbide - Viton - Stainless steel. Options: Double mechanical seal with flushing, Quench, etc.

Support:
Stainless steel support foot.

Rotor:
Large choice of construction materials: AISI 304, AISI 316, SAF

Tie bolts:
Stainless steel tie bolts.

Joint:
Open joint design for the HF range.
Oil lubricated pin joint for the HL range.

Lantern:
Cast iron design with anticorrosion treatment.
Optional: stainless steel design

Markets:

made for your process

- Deskundig advies
- Een klantgerichte organisatie die zich aanpast aan de eisen en wensen van uw organisatie
- Innovatieve en maatwerkoplossingen
- Breed assortiment vloeistofpompen van gerenommeerde merken
- Meer dan 5.000 pompen en 20.000 onderdelen op voorraad
- Een snelle en passende oplossing voor al uw vraagstukken
- Wij zien het belang in van uw processen en de continuïteit van uw bedrijfsvoering
- Snelle reactie- en levertijden
- Een eigen Technische Dienst met uitgebreide testfaciliteiten, werkend vanuit onze eigen werkplaats of bij u op locatie
- Reparatie, onderhoud en revisie van alle soorten en merken vloeistofpompen
- Storingsdienst 24 uur per dag, 7 dagen in de week
